2. It is requested that be advised of the declassification of the equipment and the related QFM technique. The contractor should be further advised that information about the equipment and modulation technique may only be released by permission of this Agency. The equipment will remain classified SECRET-NOT RELEASABLE TO FOREIGN NATIONALS. Instruction books and drawings associated with these systems as well as the association of the equipment with this Agency will also retain the classification of SECRET-NOT RELEASABLE TO FOREIGN NATIONALS.
